SUMMARY

As a frontend developer I focus on writing reliable and maintainable code. I always keep track of languages, frameworks and libraries new releases in search of improvements. My favourite part of being developer is collaboration: exchanging tech novelties, planning and dicsussing possible solutions.

EXPERIENCE

Data Entry,
Acturis Poland, Wrocław

July 2024 - Present

- Administering and updating insurance policies, conducting detailed data analysis to ensure accuracy and compliance with industry standards.
- Collaborating with a UK-based team to resolve insurance policy issues while managing and safeguarding sensitive data in compliance with privacy regulations.
- Analyzing insurance policy data to enhance project relevance and functionality.

Frontend Developer,
WMS_DEV - Scientific Circle, Wrocław

November 2023 - Present

- Designing and prototyping in Figma, translating designs into functional interfaces using React, TypeScript, and Styled Components.
- Using JetBrains Space to manage tasks effectively, facilitating collaboration and streamlining project tracking within the team.
- Providing strategic insights on technology choices, assisting the team in selecting optimal tools and frameworks for ongoing project development and implementation.

Internship,
2M Marek Workiewicz, Nysa

February 2022 - March 2022

- Developed features for both mobile and desktop platforms using HTML, CSS and JavaScript.
- Applied SEO best practices to boost website visibility and performance.

Internship,
2M Marek Workiewicz, Nysa

June 2021 - June 2021

- Developed websites ensuring cross-browser integration and compatibility.
- Performed comprehensive troubleshooting for hardware and software issues.
- Conducted installation and configuration of programs and drivers.

PROJECTS

- **Solar Sense** - The project provides remote monitoring of photovoltaic installation production. It supports both Polish and English, includes a demo mode, and uses a custom proxy server to manage CORS and secure API communication.
Tech Stack: React, TypeScript, Tailwind CSS, Radix UI, API Integration, i18n (Internationalization), PostCSS

- **Zen** - A comprehensive management application designed to help you organize tasks, take notes, and manage your time efficiently. The project offers a modern, responsive, and intuitive user experience, including dark mode.
Tech Stack: React, TypeScript, Tailwind CSS, Shadcn UI, PostCSS, Local Storage

- **Weather** - Real-time weather data and forecasts are provided by utilizing the OpenWeatherMap API. The app offers weather information for both a specified location and the device's current location via the Geolocation API.
Tech Stack: React, JavaScript, Tailwind CSS, Material UI, API Integration, PostCSS
